Divinités Primordiales

Vincent Cox

Geschreven in opdracht van het slagwerkensemble van de "Koninklijke Oude Harmonie" Eijsden en Henrico Stevens. Mede mogelijk gemaakt door een bijdrage van het Nederlands Fonds Podiumkunsten.

Deze compositie van Vincent Cox voor groot slagwerkensemble geeft op muzikale wijze een aantal Griekse oer-goden weer. Iedere god of godin weerklinkt in zijn of haar eigen muzikale verhaal, als een soort leidmotief.

CHAOS:
in de Griekse mythologie het Niets waaruit de eerste goden ontstonden. Chaos wordt wel voorgesteld als een bodemloze leegte waar alles eindeloos 'valt'; niet naar beneden, want er is geen enkele oriëntatie mogelijk, maar alle kanten op. Uit deze uitgestrekte malende wanorde ontstond orde in de vorm
van Nacht, Duisternis, Aantrekkingskracht, Onderwereld en Aarde.

GAIA:
Zij is de oermoeder, de Aarde, die ontstond uit
de Chaos aan het begin van de dingen. De Chaos bevatte alle basisbestanddelen, de vier elementen aarde, water, lucht en vuur. Gaia, de godin van de natuur, werd afgebeeld als een mollige vrouw, vaak oprijzend uit de grond, altijd craan verbonden.

NYX:
oer-godin van de nacht. Zelfs Zeus had veel respect voor haar en deed zijn best haar tevreden te stellen. De godin werd in het Oude Griekenland zelden echt vereerd. De godin van de nacht reed langs de hemel in
een strijdwagen met twee paarden ervoor, terwijl zij de donkere nevels van Erebos over de aarde legde.

ERÈBE:
god van de duisternis. Zijn dichte nevels omringden de randen van de platte aarde, en vulden de donkere plaatsen eronder. Zijn zuster Nyx (de nacht) leidde deze donkere sluier elke avond over de aarde, terwijl haar dochter Hemera (de dag) de nacht elke ochtend weer verdreef. Ook zou Erebos de verpersoonlijking zijn van de drie kringen van duisternis rond Tartaros, het dodenrijk.

HEMERA:
de goddelijke personificatie van de dag. Volgens de mythe zou Hemera Tartaros (de onderwereld) verlaten wanneer Nyx (de nacht) binnenkwam en vice versa. Zo verklaarden de Grieken de natuurlijke wisseling tussen dag en nacht. Hemera werd meestal gezien als de dochter van Nyx en Erebos (de duisternis). 's Avonds hing Nyx een sluier van duisternis en liet zo de nacht vallen. 's Ochtends joeg Hemera deze mist uiteen.

EROS:
De oergod Eros is minder bekend dan zijn naamgenoot, de god van de (zinnelijke) liefde. Hij zou de god zijn van de universele liefde en is de zoon van Erebos en Nyx. Hij wordt ook wel gezien als de vader van Gaia.

TARTARE:
is een deel van de onderwereld in de Griekse mythologie; het grote, treurige rijk onder de aarde, "even ver verwijderd van de aarde als de aarde verwijderd is van de hemel". Net als Gaia en Eros is hij ontstaan uit Chaos. In dat schimmenrijk zwaaide de god Hades, de broer van de oppergod Zeus, de scepter. Daarmee was Hades ook degene die de leiding had over de Tartaros, het ergste deel van de onderwereld.
